

January 26, 2005.

With Reference to the G.S. Wark Ltd.

To Whom It May Concern:

The G.S. Wark Ltd. company has been involved in many successful projects in partnership with McMaster University over the years. I have had association with them in my capacity with the University for the last 16 years. The latest project this company won the contract for was the new addition to the Information Technology Building. That project was successfully completed in the summer of 2004. Further to this, G.S. Wark have undertaken a wide range of construction and renovation projects for the University, both large and small.

G.S. Wark has always done an exemplary job for the University. They have maintained good control of their project details and sub-contractors. Their on-site supervision has been excellent and they have always been very fair and honest to deal with in every aspect of their work for us. They have also been attuned to our needs, given the wide diversity and sensitivity of the McMaster community. They interact well with not only our in-house Management group but also our Consultants.

I would have no hesitation in recommending this contactor for any project. It is always a pleasure to do business with them!

Sincerely,

Stuart Young,
Project Manager,
Technical Services Group,
Physical Plant, McMaster University.
